

RE: FCC Compliance

January 1, 2016

To Whom It May Concern:

This statement is meant to serve as formal notification, for distributors, resellers and end users, regarding our status in the above matter.

The products distributed by Chemyx are generally exempt from compliance with the EMC-related technical specifications promulgated by the FCC because our products are used exclusively as industrial, commercial or medical test equipment, which are exempt devices under CFR 47 § 15.103 (c).

Though we are not required to show compliance with these regulations, no harmful levels of electromagnetic interference are emitted by Chemyx products; our devices are safe to use as intended, by competent adults in an appropriate setting.

Feel free to contact us with questions or concerns.

Kind Regards,

Jeff Wu
Senior Engineer
Chemyx, Inc.
